CARLOS LOPEZ

Front End Software Engineer

SUMMARY

Creative, details-oriented, Front End Software Engineer with a deep interest in AI. Proven track of creating and implementing successful front and backend web applications. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Digital Giving Site Coordinator at United Way, Hartford, CT

September 2023 – December 2023

- Developed responsive sites using the GivenSmart platform to facilitate fundraising for United Way clients and community support.
- Conducted meetings with clients to understand their needs and requirements.
- Provided explanations of available options for assistance and support.
- Updated, added, and organized the database regularly.
- Generated reports to keep clients informed about funds collected.
- Maintained consistent and clear communication with clients via email or phone.

Front End Web Developer at Upwork, Buffalo, NY

September 2022 – May 2023

- Developed dynamic and visually appealing web applications by translating Figma designs into responsive and interactive user interfaces using HTML5, CSS3, Bootstrap, and JavaScript.
- Ensured seamless website functionality through regular updates, removal of outdated content, and rigorous testing procedures.
- Implemented responsive design principles to optimize user experience across various devices and screen sizes.
- Enhanced website interactivity and user engagement by integrating custom functionalities using JavaScript.
- Facilitated effective communication with clients, conducting meetings to comprehensively understand their requirements and providing transparent timelines for project completion.

Recent Projects:

Job Hunter (Fullstack Web App) – It's a platform that allows users to keep track of their job applications. Users can register and sign in, and start adding, updating, and deleting their job applications. It also provides some free resources to be used as guidance on how to build a resume, cover letter, and how to get ready for interviews.

Newbie Job Finder (Fullstack Web App) – Company aiding entry-level candidates or those exploring career shifts. Users register and utilize the platform's dashboard to view recent entry-level positions. This feature enables job applications, profile creation, image uploads, direct messaging to tech support, application removal, job title searches, and offers diverse candidate services.
